Preparation Instructions for Extermination of Bed Bugs by Heat Treatment

Items that must be removed from treatment areas or be protected:

- Pets - Including fish in aquariums.
- Please Remove all firearms & Ammunition from home.
- House Plants.
- Fresh Food - fruits, vegetables, etc.
- Food that melts - chocolate, candy, etc.
- Wine bottles.
- Prescription & over the counter drugs.
- Cosmetics & deodorants.
- Art Supplies.
- Wax based items - candles, wax figurines & fruit, lipstick, etc.
- Anything pressurized - spray cans, fire extinguishers, oxygen bottles, hairspray, etc.
- Flammables - lighters, lamp fuel, alcohol, solvents, etc.
- Wooden & stringed musical instruments - leave the cases.
- Family heirlooms & irreplaceable items should be inspected & a determination made as to whether they should be treated.
- Please remove any clutter or empty bags & boxes that may be on the floor, this allow for better Heat Dispersment.
- Empty all closets of boxes, books, & loose items from the Floor, so heat treatment can flow freely.
- **ENTRANCE INTO THE HOME IS PROHIBITED DURING THE HEAT TREATMENT. UPON COMPLETION OF THE HEAT TREATMENT, A TECHNICIAN MUST GIVE APPROVAL TO RE-ENTER THE HOME.**

** Heavily cluttered areas will decrease the effectiveness of the treatment! **

Any items that you remove (as noted above) should be packed in tightly sealed plastic containers or in plastic bags. Carefully inspect the items before you package them up to remove. If there is any bed bug activity on the item, leave the item in the bathroom. We will attempt to treat the item, but will not be responsible for any damage. NOTE: **DO NOT** reuse the bags once you return & put the item back.

Clothing:

Prior to our arrival, all clothing, extra stored bedding, linens, & other soft goods **MUST** be removed from treatment area & washed with a machine washer. Then, the items **MUST** be placed in a dryer on high heat for a minimum of 45 minutes to kill bed bugs & eggs. Clothing that is hanging in closets is ok to leave hanging, as long as there is adequate space to allow for airflow. It is **ESSENTIAL** that all laundry be done **BEFORE** our arrival, & cannot be brought back into the living area of home until the treatment is complete & the items are laundered properly, as detailed above.

** Special Note: In order to prevent reintroduction of bed bugs, wash and dry on high heat all clothing to be worn the day of treatment. Do not bring or wear clothing back into the building, unless it has been heat treated. **

Papers, smaller items, etc.:

- A Thermal Remediation treatment requires moving large amounts of air to be successful. All items that can be blown around & possibly damaged need to be protected
 - o Loose papers need to be gathered & boxed.
 - o Glass items, knick-knacks, etc. will need to be secured. Do not leave breakable items on shelves or other areas where damage could happen.

Electronics - televisions, computers, video players, stereos, etc.:

- Electronics like Laptops, Ipad, cell phones, E cigarettes, or any Vaping Cigarettes need to be removed from home while it is being treated.
- Unplug all electronics. This includes computers, stereos, TV's, gaming systems, clock radios, etc.
- Remove any vinyl LP albums, VHS, or cassette tapes to avoid potential damage.
- Plasma TV's must be removed from treatment area.
- Disconnect all electronic appliances by unplugging them from the wall outlet. The Stove, Refrigerator, & washer & dryer may stay plugged in.
- Remove batteries from all units, including Carbon Monoxide & Smoke Detectors.

Waterbeds and airbeds:

- Waterbeds will need to be drained. If the waterbeds is not drained, it will prevent the frame from reaching lethal temperatures.
- Airbeds will need to be partially deflated to avoid damage.
- Select comfort type airbeds with an electronic pump must be partially deflated & unplugged from the wall outlet.

Upon re-entering the unit, your resident/client will notice a few things:

- The room temperature will be elevated. A cool down period may be needed to attain temperatures that the client(s) are comfortable with. Open windows to help with cooling.
- During the heating process, many of your belongings are shifted around in order to achieve the best distribution of heat. Unfortunately, it is your responsibility to put things back where you want them. We apologize for any inconvenience that this may cause.

******Please vacuum all carpets & dust/clean furniture******

******Dirty or unsanitary conditions will result in the denial to perform treatment services.******

*******Failure to comply with any of the above requirements or same day cancellation of service will result inability to perform services as agreed to in the contract. A non-compliance fee of \$500.00 will be due and a new service agreement will need to be executed.*******

If you should have any questions regarding these procedures, please do not hesitate to contact your account manager or customer service at:

1-800-225-5305

I have read the 3 pages of heat treatment preparation instructions contained in this document and take responsibility for ensuring the client or tenant's room is ready for treatment on the day of service. If the unit is not prepared for treatment according to the above instructions or if same day cancellation of services, Turner Pest Control may charge my company \$500 as a non-compliance fee.

Turner Pest Control is not responsible for any damaged items left in the unit during the heat treatment.
