COCKROACH TREATMENT PREPARATION SHEET

To control cockroaches, sanitation is essential! **It's important to perform a thorough cleaning before, not after, the treatment.**

The following steps must be taken before we will perform a cockroach treatment:

- Clean kitchen thoroughly, including floor, range hood, & counter tops. Clean inside & outside of the dishwasher. Pull out appliances & clean behind & underneath.
- Remove all items from kitchen cupboards & drawers. Wash cupboards inside & out, wipe out drawers, clean sink & countertops. Items removed from the cabinets may be placed on the kitchen table or on a couch or chair.
- Bathroom cabinets & under sink should be cleaned. Wash cabinets inside & out, wipe out drawers, clean sink, tub, inside & outside of toilet.
- Pick up & remove all trash inside of the home.
- Vacuum all carpets.
- Pets should be removed from inside.
- Fish tanks should be covered with damp towel & air pump shut off.
- Birds must be removed from the premises for 8 hours.
- Children's toys & pet food dishes & any exposed food should be placed in a protected area.

After Our Treatment Is Complete:

- Thoroughly wash (with soap & water) all exposed eating surfaces (including table & counter tops) & any exposed dishes or silverware. Do not wash any treated surfaces, such as baseboards.
- In roach control, sanitation is essential. Do not leave empty milk or beverage bottles inside. Keep areas under & behind the stove & refrigerator clean. Do not allow food & garbage to accumulate. Pet food should be stored in sealed containers.
- It is normal to see live or dying roaches for several days or weeks after the treatment. It may take several days for roaches hiding in inaccessible areas to contact treated surfaces.
- Your home will be treated as necessary every 7 days until this initial infestation is deemed clear.
- It is usually not necessary to clear out cupboards for follow-up treatments.
- Our pest control technician may advise pest proofing to limit harborage areas for successful eradication.

Call Turner Pest Control at (800) 225-5305 for any home or business pest control prevention or elimination.
