What To Expect During Your Disinfection Service

The EPA has determined that the Disinfectant product that Turner Pest Control will apply, is effective against SARS-CoV-2, the cause of COVID-19.

The disinfection process involves the use of an ultra-low volume (ULV) mister designed to disperse the disinfectant in fine particles that will float in the air until they slowly settle onto the surfaces.

The surfaces will become moist for a short period as the disinfectant is acting. The surface will then be left to dry.

We will wipe down frequently touched areas, such as doorknobs, cabinet handles, under counters, & more.

There will be no access to the space for up to two hours after the application is complete, depending on the ventilation of the structure.

Disinfectant Preparation List

For our company to provide the best possible service, we ask that you make a few simple preparations before we arrive. The following preparations are minimal, but they are critical to the success of the program. Provider will advise you if actions are needed beyond what is listed below. **No liability is assumed on the part of Turner Pest Control for client's failure to follow these guidelines.**

- Remove any materials that could be damaged by moisture, such as paperwork & artwork.
- Remove any trip hazards to allow clear access for our technicians.
- Remove any valuables from the areas to be treated.
- All food items **MUST** be removed from areas to be treated.
- Food containers & utensils should be stored away in cupboards or drawers.
- All electrical equipment, such as keyboards & monitors, should be covered in plastic. Provider will wipe down these areas with disinfectant.
- Clean visibly dirty surfaces before the service.
- Wool carpets or fabrics should be removed or covered & exposed fabrics should be tested for colorfastness.
- All pets need to be removed from the disinfectant area.
- If fish tanks are on premises, please turn off the pump & cover with a sheet.

After Our Treatment Is Complete

Apart from enjoying peace of mind, please complete the following tasks:

- Any moisture remaining should be dried with a paper towel then, disposed of.
- Thoroughly rinse any treated food contact surfaces with potable water.
- Thoroughly rinse any food/drinking containers before use, if they were left in exposed areas.
- Ensure any new materials that are brought back into the area are properly cleaned & disinfected.

☐ I have read the instructions and will comply with the above instructions to the best of my ability.
