Flea Treatment Preparation

Fleas are very difficult to eradicate without your help! We have developed a special checklist for our customers to complete during & after the treatment process. We ask that you please complete all items listed. When this checklist is followed, we have discovered that not only are our treatments faster & more effective, but it also costs our customers less time & money in the long run.

Please Complete These Items Prior to Treatment:

- Be prepared to vacate the dwelling during the treatment & for 4 hours following service to allow time for chemicals to dry. Do not enter or allow children or pets to enter the treated structure for at least 4 hours unless specified otherwise.
- Clear all carpeted floors – including closets – of boxes, clothing, & any other items that will prevent treatment. Place dishes, silverware, pet food dishes, & children's toys in protected area.
- Wash (in hot water) or destroy all pet bedding. If bedding is put into trash, put into sealable plastic bag & dispose of into an exterior trash bag.
- Mop wood, tile, & vinyl floors.
- Vacuum all carpeting & rugs thoroughly. Carefully vacuum pet sleeping & resting areas - under furniture, cracks, & crevices in floors & draperies. Vacuum furniture - especially between & under cushions. Empty the contents of the vacuum cleaner into a plastic bag & immediately dispose of the bag in an outside container.

- Remove all pets & birds from the premises. Make sure to shut off air in fish tank & cover with a damp towel, unless saltwater tank.
- Store or cover all pet food containers & bowls.
- Have dogs, cats, & other flea-infested pets professionally treated by your local veterinary clinic at the same time the home is treated.

Please complete these items after our treatment:

- Do not enter the home for a full 4 hours after the treatment is completed. Immediately upon entering the treated structure after the treatment, air out thoroughly.
- Wash (with soap and water) all exposed eating surfaces (including table & counter tops) & any exposed dishes or silverware.
- DO NOT clean carpets or floors with detergents or cleaners for at least one month after treatment is complete.
- Continue to vacuum daily for one week. Be sure to dispose of the bag after each vacuuming in sealed plastic & place in an exterior trash bin.
- A follow-up service will be scheduled for 10-14 days after the first application. Please repeat all pre-treatment preparations on the day before the follow up visit.
- Exterior flea treatment is also recommend.

* If you are ill or pregnant, or if you or any member of your household has sensitivity to chemical odors or other odors, we recommend that you consult with your physician prior to the treatment. *

Call Turner Pest Control at (800) 225-5305 to schedule your flea treatment.
